At the push-of-a-button ...communicate with multiple work groups, coordinate activities or expedite orders. Rugged and dependable, the new D-Series Jobcom portable radios will empower any work crew to get more done, more efficiently than you ever thought possible.

With Jobcom radios communication is instant. There are **no air time charges or service fees**, busy signals, phone numbers to remember, or lost productivity on non-business calls. Jobcom radios transmit directly from one radio to another ...no extra equipment is required and they're compatible with virtually any other two-way radios operating on the same channel frequencies.

Each D-Series radio can be tailored for your specific need. For example: each D-Series radio can be programmed to display as few as 1 channel or as many as 10. Features like channel scan, weather scan and weather alert can be turned on or off depending on the need, they're powerful and feature rich, yet flexible

Lightweight, small and easy to carry yet capable of withstanding a 6 foot drop onto concrete. In fact, ounce for ounce Jobcom radios are tougher than any other professional business radio in its class.

Applications:

Security • Schools • Construction • Retail Stores
Manufacturing/Warehousing • Special Events
Maintenance • Hotel/Motel/Property Management

*License Free on specific MURS frequencies
Size and Weight Specs -4.75" x 2.2" x 1.43" -11.5 oz with battery.
Each radio includes battery pack, wall charger, flexible antenna, belt clip.

Special Features in VHF D-Series Radios:

- **MURS Certified** "No License" Required On Specific VHF Frequencies
- **NOAA Weather Channel** (VHF only)
- **NOAA Weather Alert** (VHF only)

Special Features Explained

Channel Scan -Channel scan allows multiple channels to be monitored without changing channels.

NOAA Weather Scan (VHF models only)
After selecting the NOAA weather frequency for your area you can select this channel and monitor the local NOAA weather broadcast.

NOAA Weather Alert (VHF models only)
After selecting the NOAA weather frequency for your area and turning the Weather Alert feature ON, your radio will automatically look for the Emergency Weather Alert broadcast tone. When the tone is heard, your radio will immediately revert to the NOAA Weather Emergency broadcast.

2-Tone Paging Decode -In systems designed for 2-tone encode paging, JMX 144/146/444 D-Series radios can function as a pager and a compact 2-way radio. The radio can be programmed to "listen" for specific paging tones and alert the user with a distinct ring as well as visual indication via the bright LED display.

VHF/UHF Wireless Voice Alarm Reporter -Ideal for monitoring doors or limited access areas. Connect to any contact closure or switch and this battery-operated radio transmitter monitors critical areas on a 24/7 basis. Transmits a "custom" voice alert message to all radio-equipped personnel. *It's like being in two places at once!*

VHF/UHF Wireless 2-Way Radio Callboxes -Two-way Callboxes provide an efficient and cost-effective method of two-way voice communication between visitors and your radio equipped personnel. These battery operated callboxes provide wireless communication over existing two-way radio systems without costly trenching, extensive wiring, or dedicated phone lines.

VHF/UHF Two-way Base Station/Wireless Intercom
Great 24/7 2-way radio monitoring. Ideal for service desk, office administration, and security. Stationary desktop or wall mount radio is compatible with virtually any VHF or UHF radio. Includes built-in weather scan (VHF models only) and Interference Eliminator features. Operates on 110 VAC or 12 VDC, so no batteries are required.

Always ready...always there...always on!
